DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to circuitry (or methods) which includes at least two floating gate transistors, classified in class 327, subclass 543.
- II. Claims 31-34, drawn to one specific floating gate transistor, classified in class257, subclass 314.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed requires at least two transistors with floating gates, but does not require the particulars of the subcombination as claimed because the one transistor (with its floating gate connected to its control gate), within some of the claims within group I., does not necessarily require the first/second dielectric layer relationships as recited within subcombination claim 31. The subcombination claims have separate utility such as a single floating gate transistor with the control gate connected to the floating gate, and specific first/second dielectric layer relationships with respect to the channel region, floating gate, and control gate. This single floating gate transistor can be utilized in other circuitry that may require only one floating gate transistor, and does not require any other floating gate transistor to be associated with it.

Application/Control Number: 10/656,982

Art Unit: 2816

Because these inventions are distinct for the reasons given above and the search required for Group II., restriction for examination purposes as indicated is proper.

Telephone calls were made to the applicants' representative James E. Parsons (Reg. No. 34,691) on Oct 19, 21, and 26, 2004 to request an oral election to the above restriction requirement. Although messages were left on the 19th and 21st calls, no response was received. Therefore, no election has been made and the requirement is now being made in writing.

The applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication from the examiner should be directed to Terry L. Englund whose telephone number is (571) 272-1743. The examiner can normally be reached Monday-Friday from 7 AM to 3 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tim Callahan, can be reached on (571) 272-1740.

The new central official fax number is (703) 872-9306.

Application/Control Number: 10/656,982

Art Unit: 2816

Page 4

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-1562.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
